This is a best version of Vray for 3ds Max.Q: Math behind the default HDI product and number of characters in a query I am working on a project where there is a need to have a value in the range 1 - 500 HDI. I am using this property which will give me the desired result. However, on my applications it is not possible for users to pick the HDI number in between 1 and 500. It is possible for them to only select a single number in the range. For that I am creating a variable which represents the number of characters the user has selected and based on that number I am formatting the product string. I am doing something like this
